

## SERVICES AT ACCELEARNING

### Processing and Cognitive Enhancement:

The acclaimed **PACE brain training program** is designed to **help** children and adults, **age six and older**, **improve** their weak, **underlying learning skills**. **Significant gains** will be seen in this **twelve-week program**, helping the student **learn easier, faster**.

**Master the Code** is a **sound-to-code based reading and spelling program**, helping students **build a solid foundation to sound out words** and gain confidence in **reading and spelling**.

Screening and diagnosis for **Irlen Syndrome**, also known as **Scotopic Sensitivity Syndrome**, which is a **perceptual processing disorder** which makes it difficult to read print. **After diagnosis**, through a method developed by **Helen Irlen**, a **client-specific combination of colored overlays** will be used to **make reading easier**.

**T.O.V.A. screening for attention**. Determine if attention skills are similar to those of same age and gender using the acclaimed computerized T.O.V.A. If results deviate from the norm,

**Accelelearning can then refer clients to area professionals specializing in treatment of attention disorders.**

**Reading Speed and Comprehension**. Improve your reading comprehension with various researched-based reading strategies taught by a licensed reading teacher. Pre and Post testing available. EyeQ® by Infinite Mind, which helps to improve "**reading and language skills** while increasing memory, comprehension, attention, and processing rates." (quoted directly from the EyeQ® website) is also incorporated into a personally tailored reading program.

**Writing Skills, Study Skills, and Tutoring in schoolwork**. Systematic, researched-based writing instruction tailored to client's needs based on diagnostic assessment. Also **Study Skills instruction and Tutoring** for schoolwork. Preparation and practice for examinations,

**AND MORE!**

## MISSION

AcceLearning's Mission is to individualize learning interventions based on understanding the learner's personal pattern of strengths and weaknesses so that each learner can learn easier and faster while having fun.

### Philosophy

- All children can learn.
- Everyone has his or her own pattern of learning strengths.
- Brain Training can improve learning.
- Learning can and should be fun!

### Motto

"Learn easier and faster at **AcceLearning!**"

### Slogan

"Learning is fun and games at **AcceLearning!**"

## Our Goal: Learn Easier and Faster

Here at AcceLearning, learning is Fun and Games! Featuring the Train the Brain programs of P.A.C.E. and Master the Code, students can go from discouraged and unmotivated to excited and confident learners in as little as twelve weeks of intensive training. The programs are taught by certified P.A.C.E. and M.T.C. instructor, Mrs. Cindy A. Winkelman, who is also a DPI-licensed Special Education, English, and Reading teacher. Cindy Winkelman also offers academic assessment and screening for learning and reading difficulties. She offers Irlen screening for reading and light sensitivity disorders;

screening and referrals for eye movement, auditory, and language and attention difficulties. With over 17 years of experience working with students with learning difficulties and with attention and organizational difficulties, she also offers sessions in study skills, tutoring, and homework mentoring. A certified English and reading teacher, Cindy Winkelman is able to offer both a researched-based writing and reading program tailored to the specific needs of your child. These needs are determined by the results of standardized pre-testing. Results are measured with post-testing using these same standardized tests. As students increase their learning speed and capacity, they learn easier and faster, continuing their growth even after training is over. Free testing a year later is offered to substantiate the lasting results and determine the amount of growth gained.

**Please contact me for further information about these products and services. I look forward to speaking with you soon about how AcceLearning can help you or your child.**

## Client Feedback

⇒ "Cindy has been an awesome teacher to work with. She always seems to know how to get my son to focus and co-operate during tutoring. She always is very enthusiastic and has wonderful words of encouragement and praise for Carl...and Cindy always knows how to make it FUN. Carl's spelling, comprehension and processing speed have improved dramatically over the last 6 mos. We would definitely recommend Cindy & Accelelearning to others."

- Laura R.

⇒ "Grant used to spend 3-4 hrs. per night on homework. He took forever to finish. Now he takes his work to his desk in his room and is done in about an hour or so."

- Debra J.

⇒ "The PACE program was very helpful in pinpointing what my daughter's challenges really were. We saw significant improvements as she progressed through the program. Her ability to focus increased as well as her self-confidence. Our experience with her PACE instructor was amazing. She [Cindy Winkelman] really understood Rachel and was able to encourage her to reach her goals... This program was a Godsend and her teacher a blessing. Gratefully- The K. Family."

- Nicole K.

⇒ "Cindy is excellent. Michael had behavior problems, low self-esteem & hated school. He worked hours & hours on homework & made many mistakes. This year he is like a new kid... He is better able to focus & listen & understand... He is getting much better grades & has learned how to study better & more effectively based on his learning style. This program would benefit any student & Cindy is excellent & very knowledgeable."

- Anne E-S.
